PROJECTS / OPEN-SOURCE

Netflix Clone | Link

HTML,CSS, Javascript

Developed a fully functional Netflix clone as a part of my resume project, focusing on the frontend aspect. This project showcases a user interface similar to Netflix, including features such as:

Responsive Design: Ensured compatibility across various devices and screen sizes.

Interactive User Interface: Implemented dynamic elements such as hover effects, smooth transitions, and a responsive navigation bar.

This project highlights my ability to create visually appealing and user-friendly web applications using modern web development technologies.

Password Manager | Link

Tkinter,Turtle ,Python,Pandas

Developed a robust password generator using Python to enhance security practices by creating strong, random passwords. This project includes the following features:

Random Password Generation: Generates secure passwords combining uppercase and lowercase letters, digits, and special characters.

User-Friendly Interface: Provides a simple and intuitive interface for users to easily generate and copy passwords.
